

DOOR ACCESS SYSTEM

ACCESS CONTROL SYSTEM

FT9002A/4A: Door Access System Controller

Fasttel supplies an access control system that can be used in any building and is suitable for multiple doors.

The basic controller FT9002A has a strong steel housing. The status of the system can be read from the outside via 4 clear LEDs.

On the inside you will find a diagram of all possible connections.

The following can be connected to the controller:

- Wiegand card readers 26 / 34 / 42 / 66 / 128 / 256 bit
- QR Code reader
- Keypads

Each reader connection has:

- Door contact
- Exit button on each reader
- Door position open or closed
- Glass break notification

Furthermore, the system has 4 general messages/ alarm outputs

- 220 volt failure
- Low battery voltage
- Tamper notification
- Fire notification

These texts can of course also be replaced by other texts, but the approach is that these 4 messages have their own reporting contact no/ nc and can be connected to an alarm system or control room dialer.

FT2501KIPVC Wizard Elite

with Wiegand access keypad and Wiegand card reader.

FT25K

Access keypad
150 x 150 mm

FT24K

Access keypad
143 x 143 mm

FT23K

Access keypad
136 x 51 mm

SPECIFICATIONS

Our controller is fully programmable via the web interface and can, if desired, also be registered on our cloud platform in order to be linked with multiple controllers.

The system can use:

- Anti-Passback
- Interlock
- Provided with a full annual schedule including holidays
- Multiple steps in rights
- Create multiple user groups yourself
- Automatic reboot

We use Wiegand readers with various protocols.
You can also connect our finger readers.

Not unimportant: we can use QR code readers. Ideal at a B&B where the visitor can receive the QR code in his reservation confirmation.

The system can be equipped with an emergency battery of 7Ah.
